RE: Safe Drinking Water Act Information (Docket No. SDWA-PWS-IR-14-001)
Greenburgh Consolidated Water District #1 (PWS ID: NY5903429)

Dear Mr. Feiner:

The United States Environmental Protection Agency (EPA), Region 2, is responsible for assuring that Public Water Systems (PWSs) in New York State deliver safe drinking water under the authority of the Safe Drinking Water Act (SDWA). Section 1445(a)(1)(B) of the SDWA, as amended, 42 U.S.C. §300j-4 (a)(1)(B), and 40 C.F.R. Part 141 Subpart D provide the EPA with the authority to require the submittal of information necessary to verify compliance with federal drinking water standards.

On January 5, 2006, EPA promulgated the Long Term 2 Enhanced Surface Water Treatment Rule (LT2) (see 40 C.F.R. Part 141, Subpart W). The LT2 supplements existing microbial treatment and further protects public health from illness due to *Cryptosporidium* and other microbial pathogens in drinking water through risk-targeted treatment requirements based on the results of source water monitoring. The LT2 requires all PWSs that use an unfiltered surface water source provide treatment for *Cryptosporidium*. Based on the information provided to us by the New York State Department of Health (NYSDOH), the Greenburgh Consolidated Water District #1 receives unfiltered water from New York City's Catskill/Delaware Water System. The degree of required treatment depends on the level of *Cryptosporidium* in the source water, as determined through the required monitoring; however the rule requires a minimum of 2-log inactivation/removal for all unfiltered systems. Further, unfiltered PWSs must meet overall treatment requirements using at least two disinfectants and must continue to meet all applicable filtration avoidance criteria.

Under the authority of Section 1445 (a)(1)(B) of the SDWA, as amended, 42 U.S.C. §300j-4 (a)(1)(B), the EPA hereby requests that Greenburgh Consolidated Water District #1 respond within thirty (30) days of receipt of this letter with documentation and certification demonstrating the system's compliance status with the LT2 secondary disinfection requirement by the October 1, 2013 deadline for Schedule 3 systems.
